

The people of New Jersey are, for the first time in many years, finding a new sense of privacy and control over their freedom from unwanted communications. The F.C.C. should compare the New Jersey DNC plan to those adopted elsewhere and strengthen those which do not offer parallel protections. We also wish the F.C.C. to know, that the DNC policy is one of the few times in recent history where public demand has been met by reasonable government controls. The possibility of a return to unrestricted commercial calling or to weakened DNC provisions would be an highly negative and explosive issue among the public. My family and I can see no productive reason to change the DNC policy or current protections. for residents of New Jersey. Thank you,

Robert H. Barney
